

# BLOWING BUBBLE ACTIVITIES

Who can blow the most Bubbles?

Here a few things you will need:

Bucket, Straw, floating toys (any small toy can work), Mirror and a pair of Goggles.

1. Start by getting a big bucket of water- any bucket that is big enough to fit your face in will work.
2. Fill up the bucket  $\frac{3}{4}$  full of nice warm water.

## **NOW IT IS TIME TO HAVE FUN!!**

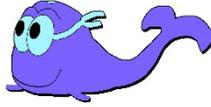

3. Take the straw and have your child put it in the water. Count how many bubbles they can blow in 5 Seconds. Then count how many seconds they can blow bubbles for!
  - Can you blow bubbles so hard that they leave the bucket?
4. Let's take away that straw and put some toys in the bucket. Who can blow the toys across the bucket? How many toys can you blow? How long did it take?

## **NOW ITS TIME TO GET WET! WHO'S READY TO TALK TO THE FISHIES??**

5. Have your child put their mouth in the water and blow bubbles to talk to the Fish! Remember to have your child blow the bubbles out as if they are blowing out birthday candles. Now have them put their ear in to hear what the Fish said back to them- switch ears.

*\*If your child is having trouble because water sneaks up their nose, try practicing by using the "M" sound or humming in the water... that will help air come out of their nose instead of letting the water in!*
6. Let's put the mirror at the bottom of the bucket. Can they see themselves? What else can they see in the bucket?

# BLOWING BUBBLE WORKSHEET

I was able to blow bubbles for \_\_\_\_\_ seconds.

I was able to blow \_\_\_\_\_ toys across the Bucket.

It took me \_\_\_\_\_ seconds to get the toy across the bucket.

I said \_\_\_\_\_ to the fish and they told me \_\_\_\_\_.

I was able to see my \_\_\_\_\_ in the mirror. I was also, able to see

\_\_\_\_\_ under water.

Blowing bubbles is so important in swimming because

\_\_\_\_\_!
